

HP Web Jetadmin 10.0

Loaded with new features and enhanced security, this total print management software is faster and easier to use than ever.

HP Web Jetadmin is the total printing and imaging fleet management utility that administrators around the world rely upon to remotely manage a wide variety of HP and non-HP devices.

Dramatically improved ease of use

HP Web Jetadmin version 10.0 is packed with features designed to save you time, improve user productivity, and make your life easy. Enjoy drag-and-drop capability, right-click functionality, single sign-on, a brand new task-based interface, enhanced management of printing supplies, and device discovery based upon Active Directory services—just to name a few.

Efficient fleet management

HP Web Jetadmin 10.0 puts more information at your fingertips, empowering you to manage your total printing and imaging environment more efficiently than ever. Ad hoc reports, customizable templates, improved performance, and a native database all help you work faster and better. Easily manage your supply inventory and assess future needs with proactive supplies reporting and alerts. Convenient supplies reordering capabilities maximize printer uptime.

Investment protection

HP Web Jetadmin 10.0 is not only designed to be an easy upgrade from 8.x, it's also compatible with the new Windows® Vista™ operating system.

New capabilities such as IPsec and consolidated security settings help protect your data by creating a more secure print environment within your organization.

With HP Web Jetadmin 10.0, ten years of industry leading printing and imaging management solutions work with you to protect your investment.

Download this free print management software and find more information at: www.hp.com/go/webjetadmin

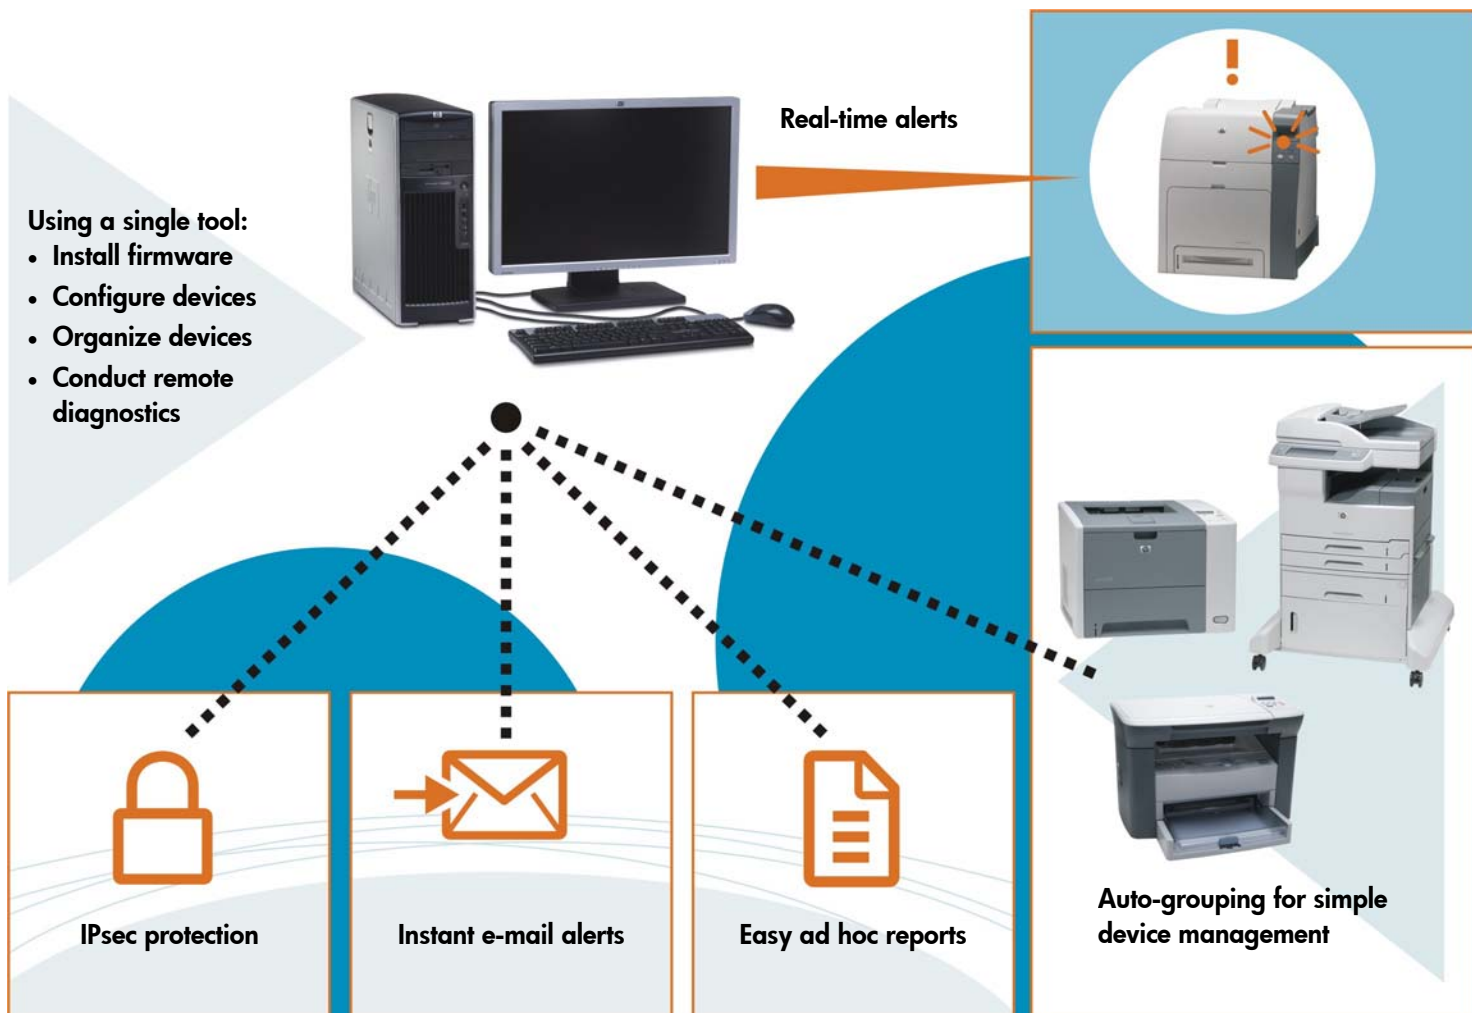

Install, configure, monitor, troubleshoot, and manage printing and imaging devices and supplies from anywhere on the network.

Get the most from your printing and imaging environment by using a single tool to manage a wide variety of HP and non-HP network peripherals—including single and multifunction printers, digital projectors, digital senders, and even third-party products.

The HP Web Jetadmin interface is easily accessible from anywhere on the network via a web browser through Smart Client technology. Web Jetadmin allows you to create settings and configure multiple devices simultaneously, eliminating the need to manually program one device at a time. Set defaults, security, and alerts, as well as MFP digital send settings, such as e-mail, SMTP server, LDAP server, and send to fax.

Watch business productivity soar as this solution helps you optimize device usage, control costs, maximize IT efficiency, and streamline supplies management. HP Web Jetadmin can be configured to monitor and analyze supplies usage to forecast future supplies needs. It allows for easy collection, storage, and display of ongoing usage information for groups of devices and facilitates consolidated online ordering of supplies. Enabled by interactive intelligence built into Original HP printing supplies and the device, you can access cartridge information, pricing, and purchasing options that best meet your needs—then conveniently and easily place an order with either HP or the reseller of your choice.

HP Web Jetadmin provides all of the fleet management capabilities you need in one easy-to-use interface. Improve productivity and cut costs. Download Web Jetadmin 10.0 today.

With version 10.0 improvements you can count on simpler operation, faster and better total print management, and a more secure print environment.

✓ Behaves more like a Windows application than ever.	With right-click functionality and drag-and-drop capability, version 10.0 is much easier to navigate, organize, and use. Find support topics faster with new searchable help capabilities.
✓ New interface provides common task assistance.	Get step by step assistance with the most common tasks under each category. Customization capabilities allow you to move task modules or turn modules on and off so you see only the most useful ones for your environment.
✓ Single sign-on.	Access is easy using existing Microsoft® permissions—you don't have to create and use an additional password.
✓ Discovery based upon Active Directory services.	Discovery and auto grouping of devices are based upon Active Directory services groups, with the ability to add printer objects to the Active Directory as part of the print queue creation.
✓ Role-based customization.	Control what users see when they access HP Web Jetadmin 10.0. Show everything to your most trusted administrators, and show other IT team members, such as the help desk, only what they need to solve problems.
✓ Supplies manageability.	Make sure devices are never down due to a lack of supplies. Proactive supplies reporting and alerts help you easily manage your supply inventory, assess future needs, and plan your supplies budget. For accurate reordering on a just-in-time basis, Web Jetadmin 10.0 provides one-click access to HP SureSupply. ¹
✓ More ad hoc reports and customizable templates.	Get better insight into your print environment and help control costs. Track everything from who uses color and how often they use it, to which devices are used most heavily and which have the highest uptime. Learn how many pages and which application users are printing from and get e-mail reports about overactive users.
✓ Significant performance improvements.	By integrating with .NET and incorporating a native database, screen-to-screen movement is faster, and configuration and management tasks are completed more quickly than ever.
✓ Much more device information on a single screen.	With the new interface, you'll find details about Status, Configuration, Alerts, Groups, Reports, Supplies, and Troubleshooting right at your fingertips—easily accessible through a series of tabs.
✓ Automated migration tools.	Enjoy a smooth transition from version 8.x to version 10.0. It's easy to back up your installation with the included backup and restore scripts.
✓ New security capabilities.	IPsec protects your data and now, with all your security settings consolidated within one configuration window, it's easier to secure your print environment.
✓ Windows Vista support.	Version 10.0 works seamlessly with Windows Vista and can manage Vista-certified devices.
✓ Intelligent update capability.	Support new devices without having to retest or reinstall HP Web Jetadmin.
✓ Functions that were once only accessible through plug-ins are now core capabilities.	Get improved print environment assessment, enhanced supplies monitoring, and balanced printer deployment with the following features—now standard with version 10.0: <ul style="list-style-type: none">• PC Printer Discovery—Provides inventory information about locally connected (USB or parallel) printers.• HP Driver Preconfiguration—Lets you set driver settings while creating a new print path in Web Jetadmin.• Report Generation—Offers powerful insight into your print environment with a variety of reports.• Authentication Manager—Lets you secure device functions via different log-in methods for each function.• HP Device Storage Manager—Provides the ability to initialize, write-protect, and securely erase disks.²
✓ Additional application plug-ins, agents, migration tools, and device and language pack plug-ins.	The following will be available at product launch at www.hp.com/go/webjetadmin : <ul style="list-style-type: none">• HP IPsec Plug-in• HP Web Jetadmin SNMP Proxy Agent• WJA 8.x to 10.0 Migration Tools• HP is partnering with a broad range of device manufacturers to develop and certify vendor and device-specific plug-ins. Device plug-ins add capabilities and configuration items unique to a particular device. The following will be released later in 2007: <ul style="list-style-type: none">• HP SNMP Trap Generation Plug-in• HP Alert Log Plug-in• A localized release of HP Web Jetadmin will include additional languages.

¹ Program features and availability may vary by country. For more information, visit www.hp.com/learn/suresupply.

² Version 10.0 does not include mapping or management capabilities for downloadable forms, fonts, and macros. For more information on restrictions, visit www.hp.com/go/webjetadmin.

HP educational courses and services help you take full advantage of Web Jetadmin.

Introduction to HP Web Jetadmin

This Web-based seminar is for IT managers, LAN managers, and technical professionals who want to effectively manage networked peripherals using HP Web Jetadmin.

HP Web Jetadmin: advanced topics

HP Education services offers a series of focused Web-based seminars aimed at exploring such topics as:

- device management
- discovery
- optimization
- planning and implementation
- security
- report generation
- Web Jetadmin plug-ins

Printing and imaging onsite training

An HP education consultant meets with you to identify the specific training needs of your organization, and to discuss the most appropriate onsite training content to meet those needs.

Implementation and Integration Service

Let our best-in-class experts assist you to gain control of your environment and improve device uptime. With a comprehensive services portfolio, you can get help with basic tool implementation and helpdesk training, as well as advanced enterprise IT infrastructure integration and customization for expanded functionalities.
